

Environmental Policy

Motivair Compressors Limited places a high priority on environmental issues both with regard to company operations and the range of services offered to its customers.

All staff are aware of the environmental sensitivity of the business sector in which Motivair operates. They are always seeking improvements, which reflect developing knowledge and changing environmental requirements.

MCL will look to continually improve our environmental performance, it can never be possible to detail fully the Company's environmental activities, but the following specific objectives form the basis of the Company Environmental Policy:

- The Company's operations must be carried out with due regard to all appropriate and relevant waste management legislation, pollution prevention and regulatory considerations; this is to ensure full compliance and regulatory conformity.
- Develop and maintain environmental management programs with objectives and targets to minimise adverse environmental impacts.
- Comply with all applicable environmental, health, and safety laws, regulations, and other requirements.
- Implement effective pollution prevention and waste minimisation programs to reduce, reuse, and recycle materials.
- Ensure that energy and water are used responsibly and conserved through innovative practices and procedures.
- Provide all staff with the training, knowledge and tools needed to meet the goals of this policy and to actively participate in efforts to prevent negative environmental impacts.
- Measure progress toward our environmental goals.
- The Company will take whatever measures necessary to ensure the collection, transportation, and storage which it operates, are not and do not become hazardous to public health or the environment.
- The Company will ensure that all collection, transportation and disposal of waste from its customers sites is covered by a written agreement, letter, order or confirmed acknowledgment, as well as the appropriate documentation to ensure that the Duty of Care (Section 34) of the Environmental Protection Act 1990, is fully complied with, regarding Controlled Waste Transfer Notes and waste descriptions.
- We are driving to reduce our Carbon footprint by intelligent engineer scheduling, by assiduous office and warehouse energy management and by using 'environmentally friendly' technology such as Skype.
- We will evaluate and audit our process annually to ensure compliance and place environmental considerations high in our business model.
